

NOTICE TO SHAREHOLDERS

VVC EXPLORATION CORPORATION Consolidated Financial Statements For The Six Months Ended July 31, 2011

Responsibility for Consolidated Financial Statements

The accompanying consolidated financial statements for VVC Exploration Corporation have been prepared by management and were approved by the Audit Committee and the Board of Directors. These unaudited condensed consolidated financial statements have been prepared in accordance with international financial reporting standards and were consistently applied. These statements are presented on the accrual basis of accounting. Accordingly, a precise determination of many assets and liabilities is dependent upon future events. Therefore, estimates and approximations have been made using careful judgment. Recognizing that the Company is responsible for both the integrity and objectivity of the consolidated financial statements, management is satisfied that these consolidated financial statements have been fairly presented.

Auditor involvement

The auditors of VVC Exploration Corporation have not performed a review of the unaudited condensed consolidated financial statements for the three and six months ended July 31, 2011 and July 31, 2010.

The accompanying notes are an integral part of these consolidated financial statements.

Notes to Consolidated Financial Statements

1. NATURE OF OPERATIONS AND GOING CONCERN

VVC Exploration Corporation (the "Company") was incorporated on April 11, 1983 under the Company Act (British Columbia) and in August 2003, was continued federally under the Canada Business Corporations Act. The Company's principal business activities include the exploration and development of precious metals mineral properties in Canada and Mexico.

For the Company's exploration stage mineral properties, the Company is in the process of exploration and has not yet determined whether they contain economically recoverable reserves. The recoverability of amounts shown for exploration stage mineral properties (note 6) is dependent upon the discovery of economically recoverable ore reserves in its mineral properties, the ability of the Company to obtain the necessary financing to complete development, maintenance of the Company's interest in the underlying mineral claims and leases and upon future profitable production from or the proceeds from the disposition of its mineral properties.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

These condensed unaudited interim consolidated financial statements of the Company and its subsidiaries were prepared in accordance with IFRS, as issued by the International Accounting Standards Board ("IASB"). As these condensed unaudited interim consolidated financial statements represent the Company's initial presentation of its results and financial position under IFRS, they were prepared in accordance with IAS 34, Interim Financial Reporting and by IFRS 1, First-time Adoption of IFRS. These condensed unaudited interim consolidated financial statements have been prepared in accordance with the accounting policies which the Company expects to adopt in its January 31, 2012 audited consolidated financial statements. Those accounting policies are based on the IFRS standards and International Financial Reporting Interpretations Committee ("IFRIC") interpretations that the Company expects to be applicable at that time. The policies set out below were consistently applied to all the periods presented.

An explanation of how the transition from Canadian GAAP ("GAAP") to IFRS has affected the reported condensed unaudited interim; statements of financial position, statements of operations, comprehensive loss, and cash flows of the Company is provided in note 14. This note includes information on the provisions of IFRS 1 and the exemptions that the Company elected to apply, reconciliations of equity, net loss and comprehensive loss for comparable periods and equity at the date of transition to IFRS, February 1, 2010.

These condensed unaudited interim consolidated financial statements do not include all of the information required for full annual financial statement.

Prior to February 1, 2011, the Company's consolidated financial statements were prepared in accordance with GAAP, which differ in certain respects from IFRS. Accordingly, the Company has commenced reporting on an IFRS basis in these condensed unaudited interim consolidated financial statements.

The preparation of financial statements in accordance with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise judgement in applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed below:

Basis of presentation and consolidation

These consolidated financial statements have been prepared in accordance with IFRS and include the accounts of the Company and its wholly-owned subsidiary, VVC Exploracion de Mexico, S. de R.L. de C.V., incorporated under the laws of Mexico in 2010. All intercompany transactions and balances have been eliminated upon consolidation.

Notes to Consolidated Financial Statements

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial instruments

Financial instruments are required to be classified as one of the following: held-to-maturity; loans and receivables, fair value through profit or loss; available-for-sale or other financial liabilities.

The Company's financial instruments include cash and cash equivalents, accounts receivable, short-term investments and accounts payable and accrued liabilities. The Company designated its cash and cash equivalents as fair value through profit or loss, short-term investments as available-for-sale, its accounts receivable as loans and receivables, and its account payable and accrued liabilities as other financial liabilities, both of which are measured at amortized cost.

Fair value through profit or loss financial assets are measured at fair value with gains and losses recognized in operations. Financial assets held-to-maturity, loans and receivables and other financial liabilities are measured at amortized cost. Available-for-sale financial assets are measured at fair value with unrealized gains and losses recognized in other comprehensive income (loss).

Fair value of a financial instrument is the amount of consideration that would be agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act. The fair value of a financial instrument on initial recognition is the transaction price, which is the fair value of the consideration given or received. Subsequent to initial recognition, the fair value of a financial instrument that is quoted in active markets is based on the bid price for a financial asset held and the offer price for a financial liability. When an independent price is not available, fair value is determined by using a valuation which refers to observable market data. Such a valuation technique includes comparisons with a similar financial instrument where an observable market price, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants exist. If no reliable estimate can be made, an the Company is permitted to measure the financial instrument at cost less impairment as a last resort.

Cash and cash equivalents

Cash and cash equivalents includes short-term and money market investments that are readily convertible to known amounts of cash and have an original maturity of less than or equal to 90 days.

Short-term investments

The Company classifies its short-term investments in public companies as available-for-sale which are reported at the fair market value based on bid prices. Unealized gains or losses are excluded from earnings and reported as other comprehensive income or loss.

Equipment

Equipment is recorded at cost. Amortization is provided over the expected useful life of the equipment as follows:

Computer equipment 30% declining balance.
Automobile Straight line of three years

Mineral properties

Mineral property acquisition costs and related direct exploration and development expenditures, net of recoveries, are deferred until the properties are placed into production. These net costs will be amortized against income using the unit of production method based on estimated recoverable reserves if the properties are brought into commercial production, or written off if the properties are abandoned or the carrying value is determined to be in excess of possible recoverable amounts. The cost of mineral properties includes any cash consideration paid, and the fair market value of shares issued, if any, on the acquisition of property interests. The recorded amounts of property acquisition costs and their related deferred pre-production exploration costs represent actual expenditures incurred and are not intended to reflect present or future values.

The recoverability of amounts shown for mineral properties and deferred expenditures is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain financing to complete development of the properties, and on future profitable production or proceeds from the disposition thereof.

Mineral properties are reviewed for possible impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. When events or changes in circumstances suggest possible impairment, estimated future net cash flows for a mine or development project are calculated using estimated future prices, mineral resources and operating and capital costs on an undiscounted basis. When estimated future undiscounted cash flows are less than the carrying value, the asset is considered impaired. Reductions in carrying value are recorded to the extent the book value exceeds the fair value of the assets.

Notes to Consolidated Financial Statements

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Impairment of long-lived assets

The Company's tangible and intangible assets are reviewed for indications of impairment whenever events or changes in circumstances indicate that the carrying amounts of the assets may not be recoverable. An assessment is made at each reporting date whether there is any indication that an asset may be impaired.

An impairment loss is recognized when the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognized in profit and loss for the period. The recoverable amount is the greater of the asset's fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit ("CGU") to which the asset belongs.

An impairment loss is reversed if there is an indication that there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized There were no significant indicators of impairment of the carrying values of long-lived assets at July 31, 2011 or January 31, 2011.

Stock-based compensation

Stock options and warrants awarded to non employees are accounted for using the fair value of the instrument awarded or service provided whichever is considered more reliable. Stock options and warrants awarded to employees are accounted for using the fair value method. The fair value of such stock options and warrants granted is recognized as an expense on a proportionate basis consistent with the vesting features of each tranche of the grant. The fair value is calculated using the Black-Scholes option pricing model with assumptions applicable at the date of grant.

Loss per share

Basic loss per share is calculated by dividing net loss by the weighted average number of common shares outstanding during the year. Diluted loss per share is calculated by dividing net loss by the weighted average number of common shares outstanding during the year after giving effect to potentially dilutive financial instruments. The dilutive effect of stock options and warrants is determined using the treasury stock method.

Income taxes

The Company accounts for income taxes using the asset and liability method of accounting. Under this method, future income tax assets and future income tax liabilities are recorded based on temporary differences between the financial reporting basis of the Company's assets and liabilities and their corresponding tax basis. The future benefits of income tax assets, including unused tax losses, are recognized subject to a valuation allowance, to the extent that it is more likely than not that such losses will be ultimately utilized. These future income tax assets and liabilities are measured using substantively enacted tax rates and laws that are expected to apply when the tax assets or liabilities are to be settled or realized.

Foreign exchange

The consolidated financial statements are presented in Canadian dollars, which is the Company's presentation currency.

Items included in the financial statements of the Company's subsidiaries are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities not denominated in the functional currency of an entity are recognized in the income statement.

Assets and liabilities of entities with functional currencies other than U.S. dollars are translated into the presentation currency at the period end rates of exchange, and the results of their operations are translated at average rates of exchange for the period. The resulting translation adjustments are included in accumulated other comprehensive income in shareholders' equity. Additionally, foreign exchange gains and losses related to certain intercompany loans that are permanent in nature are included in accumulated other comprehensive income.

Notes to Consolidated Financial Statements

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Measurement uncertainty

The preparation of financial statements, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those reported.

Significant estimates used in the preparation of these condensed unaudited interim consolidated financial statements include, but are not limited to the estimated net realizable value of mineral properties, stock-based compensation and composition of future income tax assets and liabilities.

The Black-Scholes option valuation model used by the Company to determine fair values was developed for use in estimating the fair value of freely traded options. This model requires the input of highly subjective assumptions including future stock price volatility and expected time until exercise. Changes in the subjective input assumptions can materially affect the fair value estimates, and therefore the existing model does not necessarily provide a reliable single measure of the fair value of the Company's stock options and warrants granted during the year. Future income taxes are based on estimates as to timing of the reversal of temporary differences and tax rates currently substantively enacted. By their nature, these estimates are subject to measurement uncertainty and the effect on the consolidated financial statements of changes in such estimates in future periods could be significant.

3. RECENT ACCOUNTING PRONOUNCEMENTS

In November 2009, the IASB issued IFRS 9, Financial Instruments ("IFRS 9"), which represents the completion of the first part of a three-part project to replace IAS 39, Financial Instruments: Recognition and Measurement, with a new standard. Per recent updates to IFRS 9, an entity choosing to measure a liability at fair value will present the portion of the change in its fair value due to changes in the entity's own credit risk in the other comprehensive income or loss section of the entity's statement of comprehensive loss, rather than within profit or loss. Additionally, IFRS 9 includes revised guidance related to the derecognition of financial instruments. IFRS 9 applies to financial statements for annual periods beginning on or after January 1, 2013, with early adoption permitted. The Company currently is evaluating any impact that this new guidance may have on the Company's consolidated financial statements.

4. SHORT-TERM INVESTMENTS

The following table presents a breakdown of the Company's short-term investments:

Cumeral, Mexico

In March 2010, the Company finalized an agreement which provides an option to acquire a 100% interest in the 665 hectare gold mining project known as Cumeral (the "Cumeral Property"), consisting of three mining concessions in the State of Senora, Mexico. The 100% interest in the Cumeral Property can be acquired for cash consideration of US\$800,000 plus applicable taxes ("VAT"), payable over a period of three years and the issuance of 200,000 common shares of the Company. The Cumeral Property is subject to the reservation of a 2% Net Smelter Return ("NSR"). A finders fee of US\$5,000 and 130,000 common shares of the Company was paid to third parties who were instrumental in arranging the transaction. Payments to the optionor will be as follows:

\$120,000 USD on April 15, 2010 (paid)

\$100,000 USD on October 15, 2010 (paid in December 2010)

\$100,000 USD on April 15, 2011 (paid)

\$125,000 USD on October 15, 2011

\$150,000 USD on April 15, 2012

\$175,000 USD on October 15, 2012

La Tuna, Mexico

In March 2010, the Company completed the acquisition of a 3,533 hectare gold mining project known as La Tuna, located in the municipality of Alamos in the State of Sinaloa, Mexico. The Company acquired a 100% interest in La Tuna for cash consideration of US\$40,000 plus VAT and 300,000 common shares of the Company. La Tuna is subject to the reservation of a 2% NSR with a buy-back option.

Canadian properties

Due to the lack of continuous work on these properties and units, they were written down to a minimal value. The Company intends to sell or option its interest it these properties.

Notes to Consolidated Financial Statements

7. RELATED PARTY TRANSACTIONS AND BALANCES

Compensation to key management personnel were as follows:

	7	Three Months July 31,	Ended	Six Months Ended July 31,				
	20	011	2010		2011	2010		
Compensation Share-based payments (1)	\$ 1	107,272 \$ 3,640	67,000 27,937	\$	188,272 \$ 4,206	150,000 34,475		
Total	\$ 1	110,912 \$	94,937	\$	192,478 \$	184,475		

⁽¹⁾ Share-based payments are the fair value of options granted to key management personnel and expensed during the period.

All transactions with related parties have occurred in the normal course of operations and are measured at the exchange amounts, which are the amounts of consideration established and agreed to by the related parties.

8. SHARE CAPITAL

(a) Authorized
Unlimited common shares without par value

(b) Issued:

	Number of shares	Amount	
Balance, February 1, 2010 Shares issued for mineral property	47,942,390 2,330,000	\$ 21,237,758 421,400	
Balance, January 31, 2011	50,272,390	21,659,158	
Shares issued on private placement	11,000,000	770,000	
Shares issued as share issue costs	550,000	38,500	
Share issue costs	-	(47,950)	
Valuation of share purhase warrants	-	(148,170)	
Balance, July 31, 2011	61,822,390	\$ 22,271,538	

On April 11, 2011, the Company closed a brokered private placement of 11,000,000 units at a price of \$0.07 per unit amounting for gross proceeds of \$770,000. Each unit comprises one common share and one share-purchase warrant to purchase an additional share at \$0.12 until April 11th, 2012. Palos Merchant Bank L.P. ("Palos"), through its sole general partner, Palos Management Inc., of Montreal, Quebec, acted as agent and received a fee of \$47,950 plus applicable taxes, of which \$9,450 was paid in cash and the balance settled by the issuance of an additional 550,000 common shares of the Company.

The fair value assigned to the 11,000,000 share purchase warrants was \$148,170. The share purchase warrants were valued using the Black-Scholes option pricing model with the following assumptions; dividend yield - 0%, volatility - 89.73%, risk-free interest rate - 1.92%, and expected life - 1 year.

Notes to Consolidated Financial Statements

8. SHARE CAPITAL (continued)

(c) Stock Options

The Company grants options pursuant to the policies of the TSX Venture Exchange with respect to eligible persons, exercise price, maximum options per person and termination of eligible person status. Options granted have a 5 year life and vest as to 25% upon grant and 25% each six months thereafter.

Stock option transactions and the number of stock options outstanding were as follows:

		eighted average
	Number of Options	Exercise Price
Balance, February 1, 2010 Expired/cancelled Granted	4,461,000 (154,000) 200,000	\$ 0.32 0.50 0.28
Balance, January 31, 2011 Expired/cancelled Granted	4,507,000 (1,761,000) 800,000	0.31 0.33 0.19
Balance, July 31, 2011	3,546,000	\$ 0.27

The weighted average remaining contractual life and weighted average exercise price of options outstanding and of options exercisable as at July 31, 2011 are as follows:

	Options Outstanding			Options Exer	Options Exercisable				
Exercise Range	Number Outstanding	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (years)	Number Exercisable	Ave Exe	ghted erage rcise ice			
\$0.15 - \$0.20	800,000	\$ 0.19	1.25	350,000	\$	0.17			
\$0.28 - \$0.29	1,625,000	\$ 0.28	2.01	1,525,000	\$	0.28			
\$0.30 - \$0.30	861,000	\$ 0.30	2.30	861,000	\$	0.30			
\$0.36 - \$0.36	260,000	\$ 0.36	2.94	260,000	\$	0.36			
	3,546,000	\$ 0.27	1.98	2,996,000	\$	0.28			

During the period, the Company granted 800,000 stock options to purchase common shares at a weighted average price of \$0.19 per share. Of the 800,000 options granted, 200,000 vested immediately and 600,000 vest as to 25% upon grant and 25% every three months thereafter.

The fair value of the 800,000 stock options granted was estimated at \$55,250 using the Black Scholes model for pricing stock options. The \$55,250 is being expensed over the vesting period of the respective options. Stock option compensation expense of \$47,601 includes \$32,833 relating to options granted during the period.

8. **SHARE CAPITAL (continued)**

(d) Warrants

The following table reflects the continuity of warrants:

2011

Expiry Date	Exercise Price	Balance January 31, 2011	Warrants Issued	Warrants Exercised	Expired/ Cancelled	Balance July 31, 2011	
February 27, 2012 October 9, 2011 April 11, 2012	\$0.50 \$0.42 \$0.12	1,440,000 2,857,500	- - 11,000,000	- - -	- - -	1,440,000 2,857,500 11,000,000	
	\$0.21	4,297,500	11,000,000	-	-	15,297,500	
2010		D.1				D.1

February 27, 2012 October 9, 2011	\$0.50 \$0.42	1,440,000 2,857,500	- -	- -	- -	1,440,000 2,857,500	
	\$0.45	4,297,500	-	-	-	4,297,500	

9. **CONTRIBUTED SURPLUS**

The following table reflects the continuity of contributed surplus:

	Amount
Balance, February 1, 2010	\$ 4,828,699
Stock-based compensation	143,869
Balance, January 31, 2011	4,972,568
Stock-based compensation	47,601
Fair value of stock options exercised	148,170
Balance, July 31, 2011	\$ 5,168,339

10. LOSS PER SHARE

The following table sets forth the computation of basic and diluted loss per share:

	Three Months Ended July 31, 2011 2010			Six Month: July 2011	0 =
Numerator	2011		2010	2011	2010
Net loss	\$ (179,164)	64) \$ (215,865) \$ (310,2		(310,232) \$	(429,334)
Denominator Weighted average number of common share outstanding, basic and diluted	61,822,390		48,892,390	57,297,321	48,578,280
Basic and diluted loss per share	\$ -	\$	- \$	(0.01) \$	(0.01)

As a result of losses incurred, the potential effect of the exercise of stock options and warrants was anti-dilutive.

11. SEGMENTED INFORMATION

The Company operates in one reportable operating segment, being mineral exploration. As at July 31, 2011, the Company's mineral resource properties are located in Mexico and Canada and its corporate assets are located in Canada. the Company is in the exploration stage and, accordingly, has no reportable segment revenues.

A summary of total assets by geographic region is as follows:

July 31, 2011	Canada	Mexico	Total	
Current assets Mineral properties	\$ 216,568	178,916 705,476	\$ 395,484 705,478

1.1.21.2010	C 1		T. (1	
July 31, 2010	Canada	Mexico	Total	
July 31, 2010 Current assets Mineral properties	\$ Canada 1,008,258 445,066	Mexico 193,866 1,436,123	\$ Total 1,202,124 1,881,189	
Current assets	\$ 1,008,258	193,866	\$ 1,202,124	

Notes to Consolidated Financial Statements

12. CAPITAL MANAGEMENT

In the management of capital, the Company includes shareholders equity (excluding accumulated other comprehensive income). The Company's objective in managing capital is to ensure that financial flexibility is present to increase shareholder value and respond to changes in economic and/or market conditions; to retain a strong capital base so as to maintain investor, creditor and market confidence and to safeguard the Company's ability to obtain financing should the need arise.

Currently, the Company has no outstanding debt or covenants, and therefore has no externally or internally imposed capital requirements. In maintaining its capital, the Company has a strict investment policy which includes investing its surplus capital only in highly liquid and highly rated financial instruments. The Company's investments are all short-term in nature.

The Company reviews its capital management approach on an ongoing basis. There were no changes in the Company's approach to capital management during the year.

13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company's financial instruments consist of cash and cash equivalents, short-term investments, accounts receivable and accounts payable and accrued liabilities. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest or credit risks arising from these financial instruments.

The fair value of financial assets and liabilities together with the carrying amounts in the consolidated balance sheets are as follows:

The Company has classified financial assets as follows:

The Company has classified infalicial assets as follows.	July 31, 2011	Ja	nuary 31, 2011	February 1, 2010
Fair value through profit or loss, measured at fair value:				
Cash and cash equivalents	\$ 111,433	\$	6,812	\$1,845,308
Available-for-sale, measured at fair value:				
Short-term investments	\$ 46,250	\$	158,900	\$ 207,149
Loans and receivable, measured at amortized cost:				
Accounts receivable	\$ 237,801	\$	187,813	\$ 228,207
Other liabilities, measured at amortized cost:				
Accounts payable and accrued liabilities	\$ 24,569	\$	216,716	\$ 132,762

The fair value of the Company's financial assets and liabilities approximates their respective carrying values as at the balance sheet dates because of the short term maturity of these instruments. The fair value of the financial instruments is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Financial instruments recorded at fair value on the balance sheet are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 valuation based on quoted prices (unadjusted) observed in active markets for identical assets or liabilities.
- Level 2 valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability either directly or indirectly.
- Level 3 valuation techniques based on inputs for the asset or liability that are not based on observable market data.

Credit Risk

Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash and cash equivalents. The Company invests its excess cash on a daily basis in highly liquid and highly rated financial instruments. A change in the credit worthiness of the companies invested in could have an impact on the value of the Company's daily investments. Management believes this risk of loss is remote.

Notes to Consolidated Financial Statements

13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (Continued)

Liquidity Risk

The Company has no income and relies on equity financing to support its exploration programs. Management prepares budgets and ensures funds are available prior to commencement of any such program. As at July 31, 2011, the Company does not have sufficient capital to fund its operations over the next twelve months. A Public financing is been arranged for completion in the the third or fourth quarter. As at July 31, 2011, the Company had a cash and cash equivalents balance of \$111,433, \$6,812 on January 31, 2011 and \$1,845,308 on February 1, 2010 to settle current liabilities of \$24,569 at July 31, 2011, \$216,716 at January 31, 2011 and \$132,762 at February 1, 2010.

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates and commodity and equity prices.

a) Interest rate risk

Excess cash and cash equivalents are invested on a daily basis in highly liquid and highly rated financial instruments. Due to the nature of these investments, fluctuations in interest rates may affect the carrying value of these investments. However, due to the nature of the Company's investments, such changes in interest rate would have limited impact on the Company over the short term.

(b) Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. Commodity price risk is remote since the Company is not a producing entity.

Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

Sensitivity Analysis

The Company's short-term investments consist mainly of equity investments in various publicly listed entities. Based on management's knowledge and experience of the financial markets, the Company believes the following movements are "reasonably possible" over a twelve month period:

- (i) A +/- 10% movement in the closing market value of the Company's short-term investments, with all other variables held constant, would affect comprehensive income by \$4,625.
- (ii) The Company is exposed to foreign currency risk on fluctuations of financial instruments related to cash, accounts receivable and accounts payable and accrued liabilities that are denominated in Mexican Pesos. Sensitivity of closing balances to a plus or minus 10% change in foreign exchange rates, with all other variables held constant, would affect accumulated other comprehensive income by approximately \$16,468.

14. TRANSITION TO IFRS

In preparing its opening IFRS Statement of Financial Position and comparative information for 2010, the Company adjusted amounts reported previously in financial statements prepared in accordance with GAAP. A reconciliation and explanation of how the transition from GAAP to IFRS has affected the Company's financial position, performance and cash flows is presented below. Under IFRS 1, the standards are applied retrospectively at the transitional balance sheet date with all adjustments to assets and liabilities taken to shareholders' equity unless certain exemptions are applied.

The accounting policies in note 2 have been applied in preparing:

- (i) the condensed interim unaudited consolidated financial statements for the three and six months ended July 31, 2011 and July 31, 2010;
- (ii) its opening balance sheet on the transition date, February 1, 2010 and;
- (iii) the balance sheet as at January 31, 2011.

Notes to Consolidated Financial Statements

14. TRANSITION TO IFRS (Continued)

In preparing these statements, comparative financial results for the three and six months ended July 31, 2010, the balance sheet as at July 31, and January 31, 2011 have been adjusted to comply with IFRS from amounts previously reported in accordance with GAAP.

The guidance for first-time adopters of IFRS is set out in IFRS 1, which provides for certain mandatory exceptions and optional exemptions. In preparing these interim financial statements, the Company applied the following:

Optional Exemptions

Business combinations

IFRS 1 allows a first-time adopter to elect not to apply IFRS 3, *Business Combinations*, retrospectively to business combinations that occurred before the date of transition to IFRS. The Company has elected to exercise this election.

Share-based payment transactions

IFRS 1 encourages but does not require first-time adopters to apply IFRS 2, Share-based Payment, to equity instruments that were granted on or before November 7, 2002 and vested before the transition date. The Company has elected not to apply IFRS 2 to awards that vested prior to February 1, 2010.

Mandatory Exceptions

Estimates

Hindsight is not used to create or revise estimates. The estimates previously made by the Company under GAAP were not revised upon adoption of IFRS except where necessary to reflect any differences in accounting policies.

Explanation of effect of transition from GAAP to IFRS

In addition to the exemptions and exceptions discussed above, the following narratives explain the significant differences between the previous historical GAAP accounting policies and the current IFRS polices applied by the Company.

(a) Share-based Payments

IFRS 2 is effective for the Company as of January 1, 2010 and is applicable to stock options and grants that are unvested at that date. The transition rules in IFRS 1 and IFRS 2 as applied by the Company result in the following:

- Stock options and share grants prior to November 7, 2002 are not taken into account for IFRS 2;
- Stock options and share grants subsequent to November 7, 2002 are only taken into account if they have not vested as at February 1, 2010; and,
- From February 1, 2010, all stock options, share grants and other share-based payments will be expensed in accordance with the policy stated in note 1.

Recognition of Expense

GAAP - For grants of share-based awards with graded vesting, the total fair value of the award is recognized on a straight-line basis over the employment period necessary to vest the award.

IFRS - Each tranche in an award with graded vesting is considered a separate grant with a different vesting date and fair value. Each grant is accounted for on that basis. As a result, the Company adjusted its expense for share-based awards to reflect this difference in recognition

This change had a recognition, measurement and disclosure impact on the Company, accordingly, Contributed Surplus increased by \$4,195 with a corresponding increase to deficit.

Notes to Consolidated Financial Statements

14. TRANSITION TO IFRS (Continued)

(b) Exploration and Evaluation Expenditures

Capitalizing vs. Expensing Exploration and Evaluation Costs:

Under IFRS 6, upon transition to IFRS, the Company may continue to follow its current accounting policies, whereby exploration and evaluation costs are capitalized or the Company may elect to expense all exploration and evaluation costs. Current industry practice varies from by company. Significant management judgement is required to determine appropriate accounting policies relating to the treatment of exploration and evaluation expenditures upon transition to IFRS. The Company has elected to continue to capitalize its exploration and evaluation expenditures that are directly related to the discovery, acquisition or development of exploration and evaluation activities upon transition to IFRS.

Once a company has legal right to explore a property, costs directly related to exploration and evaluation expenditures are recognized and capitalized in addition to the acquisition costs. A company is not allowed to capitalize exploration type expenses incurred while assessing the quality of property prior to having legal rights to explore the property.

The Company performed a detail review of its exploration and evaluation expenditures that were capitalized and has determined that in includes "pre-legal title" expenditures as at February 1, 2010. The Company decreased its capitalized exploration and evaluation expenditures by \$436,022 with a corresponding increase to deficit.

(c) Foreign Currency Translation

Under IFRS, foreign operations with a functional currency different from the presentation currency are retranslated to Canadian dollar using the exchange rate prevailing on the reporting date with resulting gains and losses recorded in a separate account in equity. Under Canadian GAAP, the Company had considered its subsidiaries to be integrated and non-monetary items were translated at historic rates with resulting gains and losses recorded in net income.

This change did not have an impact at February 1, 2010, however, net loss for the year ended January 31, 2011 decreased by \$5,432 due to the foreign exchange translation losses previously included in net loss under Canadian GAAP, which has been reclassified and included in other comprehensive loss under IFRS.

Reconciliations of Canadian GAAP to IFRS

IFRS 1 requires an entity to reconcile equity, comprehensive income and cash flows for prior periods. The following represents the reconciliations from Canadian GAAP to IFRS for the respective periods:

Reconciliation of Equity

	Ja	January 31, 2011		July 31, 2010	February 1, 2010
Total equity under GAAP Differences increasing (decreasing) reported shareholders equity	\$	685,313	\$	3,510,537	\$ 3,671,360

Reconciliation of Consolidated Statement of Cash Flows

The adoption of IFRS has had no impact on the net cash flows of the Company. The changes made to the statements of financial position and statements of consolidated income have resulted in reclassifications of various amounts on the statements of cash flows, however as there have been no changes to the net cash flows, no reconciliations have been presented.
